ParsaAdd 20214
Polypropylene Stiffening Masterbatch

Description

ParsaAdd 20214 is a modifying agent pipe-grade co-polypropylene masterbatch. Addition of masterbatch provides dimensional stability, stiffness, hardness, and reduced shrinkage compared to unmodified PP. It also has no negative effect on impact strength. The recommended let down ratio is 1:3 to 1:2, depending on the final application.

Characteristics

Base Polymer: Random Co-polypropylene (MFI(230°C,2.16 kg)=0.33 gr/10min)

Appearance: Natural

Form: Pellets

Processing Method: Extrusion

Applications

Sewage Pipes, Core- Tube Corrugated Pipes, Stiffening Agent
