

ParsaAdd 3235

Mineral-filled Polypropylene Masterbatch

Description

ParsaAdd 3235, a Stiff/Flexible Additive, is modified mineral filled pipe-grade co-polypropylene masterbatch that contains up to 65 wt% filler content. Addition of filler provides dimensional stability, stiffness, hardness and reduced shrinkage compared to unmodified PP. It also has no negative effect on impact strength. Recommended let down ratio is 1:5 up to 1:4 .

Characteristics

Material Status: Commercially available

Filler/Reinforcement: modified filler, 65% by weight

Appearance: White

Form: Pellets

Processing Method: Extrusion Pipe Sheets

Applications

Drain pipes, Stiffening Agent for Co-PP products.
